## WORK EXPERIENCES

### Caveman Tech: C#,Unity game developer intern

July 2023- August 2023

Project Name: Tank Game

- Project Description: A simple tank game developed using Unity 3D and C#. It allowed players to control the tank, turn the tank's head and shoot enemies.

Project Name: Coin Collecting Game

- Project Description: A simple game developed using Unity 3D and C#. Players had to collect coins and increase their score.

### Neurotime: Golang developer intern

January 2025- still going on

Project Name:Search Automator

- Project Description:This project is a Golang-based automation tool that performs automatic login to social media, executes a search query, and retrieves relevant posts. Using selenium, it navigates the social media interface, extracts post data, and presents the results for further processing or analysis. This tool is useful for automated data collection, research, and monitoring trending topics on social media.
